11th November 2026

Tender No. HAN/551/06/2020
Embassy of India
Hanoi
**

Corrigendum-I

Subject: Extension of the last date for submission of bids and revision in scope

Embassy of India, Hanoi invites attention to Tender No. HAN/551/06/2020 for supply, installation, testing and commissioning of firewalls at the Embassy of India, Hanoi.

2. The last date for submission of bids has been extended till 4th December 2026 (by 1700 hours).

3. The number of internet lines to be integrated with the firewall in the main Chancery building stands revised from two (2) to one (1). Accordingly, one (1) internet line **each** is to be integrated with the firewalls in the Chancery building and the SVCC building. The following para of the Tender document are accordingly amended as below:

Para No.	Existing	New
Clause 2.3 (Scope of Work)	One FG-61F shall be installed in the Chancery building and configured with two (2) separate internet lines of the Mission, each serving a designated group of users/network segments as specified by the Mission. The configuration shall ensure that the traffic of each user group egresses only through its designated internet line, with appropriate policy-based routing, VLAN/interface segregation and firewall policies maintaining separation between the two lines. The failover behaviour between the two lines (whether traffic of one user group shall automatically fail over to the other line in the event of line failure, or the two lines shall remain fully segregated) shall be as decided and communicated by the Mission at the time of implementation, and shall be configured by the bidder at no additional cost. The other FG-61F shall be installed in the SVCC building of the Embassy and configured on one (1) internet line of that building.	One FG-61F shall be installed in the Chancery building and configured on one (1) internet line of that building, with VLAN/interface segregation and firewall policies for the user groups/network segments as specified by the Mission. The other FG-61F shall be installed in the SVCC building of the Embassy and configured on one (1) internet line of that building.
Annexure-I, Part B, S.No. 11	Deployment, integration and testing plan with timelines, covering the configuration of the two internet lines on the FG-61F in the Chancery building and the one internet line on the FG-61F in the SVCC building, integration with the Mission's LAN, and the testing / acceptance procedure	Deployment, integration and testing plan with timelines, covering the configuration of the FG-61F on one (1) internet line in each of the Chancery building and the SVCC building, integration with the Mission's LAN, and the testing / acceptance procedure
Annexure-I, Part D.2, Multi-WAN	Support for two or more ISP/internet lines with policy-based routing and configurable failover (to be configured on the FG-61F in the Chancery building)	Deleted

4. Rest of the details mentioned in the Tender Document remain the same.
